

BIN LOCK TRIAL PROGRAM

The City of Casey is trialing a bin lock program, exclusively in Warneet to help reduce litter.

Bin locks are designed to:

- Hold shut bins if they fall over in windy conditions
- Reduce occurrences of animals pulling waste out of bins
- Hold shut a slightly overfilled bin

The locks are designed to be easy to apply and remove, while still allowing your bins to be collected as normal.

As part of this trial we will be doing two follow-up surveys to help us gather feedback and a better understand of the bin lock trial is a success. This will assist in gaining information on whether the program should be expanded more broadly across the City of Casey.

Contact us

If you have any questions or feedback about the bin lock program, please email the City of Casey Sustainability and Waste team at eduwaste@casey.vic.gov.au

 Join the **GreenLivinginCasey** Facebook group to learn and share knowledge about environmental issues, tips to reduce waste and connect with members of the community.

How to apply the bin lock

Hold the latch so that the hook is facing down and slide it under the bin handle

Bring the tabs together and thread the lock through the loop.

Firmly pull the lock down to the bottom of the bin and clip it under the rim of the bin.
